

Kendal College  
a brighter future

APPRENTICESHIP IT PROFESSIONAL  
WEB DESIGN, FAULT DIAGNOSTICS, SYSTEM DEVELOPMENT, SECURITY

## Apprenticeship Training with Kendal College

### Get your staff trained with the brand new Apprenticeship IT Professional and maximise their skill potential

The Apprenticeship IT Professional is designed to offer on-the-job-training and assessment to new and existing staff and can cover CISCO, javascript, HTML and web design, database design (php and mysql), VMWare, technical fault diagnostics, implementing and managing Windows Server 2008, remote support, security and software installation and upgrade, as well as other options. We can even offer a creative angle to include web design and Adobe Creative Suite.

The programme is specifically tailored for Cumbrian businesses and may not even cost you anything.

The Apprenticeship in IT Professional is suitable for existing staff, or we can help you to source a suitable apprentice. For more information on how we can help you with staff training call our Apprenticeship Hotline on:

01539 814718

## IT APPRENTICESHIPS

The IT Apprenticeship at Kendal College allows your staff to gain nationally recognised qualifications and develop their skill set whilst working. They will normally study one day per week in College and spend the rest of the week in work, where you will pay them an apprentice wage.

Apprenticeships are available at two levels, the Apprenticeship (Level 2) and the Advanced Apprenticeship (Level 3), with each level normally taking a year or two to complete.

The Advanced Apprenticeship can lead on to our Foundation Degree in Computing, which can be topped up to a BA(Hons) in Computing, allowing you to 'grow your own' graduates.
